

Edge Out Your Competition

Some of the best landscaping companies trust Linuxup.

Whether you provide maintenance, design/hardscape, or both, Linuxup GPS tracking solutions are built to help your landscaping business edge out your competition by improving field operations in the areas that impact you most.

More than Traditional GPS Tracking and Protection

Tracking and protecting the vehicles and equipment that keep your landscaping business running is critical. But landscaping businesses need more to stay ahead of competition.

Linuxup has gone a step further to design best-in-class software that pays your back in real, monthly ROI. How? It helps to reveal hidden opportunities to improve your field operations in fuel and labor savings, customer satisfaction, risk reduction, and scheduling optimization.

Some of Linuxup's Key Benefits for Landscaping Businesses

Real Time GPS Tracking - ideal for vehicles, powered and non-powered equipment

Maintenance Tracking - ideal for heavy use vehicles and equipment

Route Recording - ideal for fuel and crew monitoring

Custom Geofencing - ideal for arrival etas and after hours monitoring

Engine Monitoring - ideal for monitoring idle time

Proactive Alerts - ideal for out of boundary and unauthorized activity

Directional Movement Tracking - ideal for mowers and spreaders

Theft prevention and recovery - ideal for critical vehicles and equipment

Let Us Show You
