

Vehicles & Worktrucks

Key areas to inspect:

- Engine oil, coolant, brake fluid, and transmission fluid
- Belts, hoses, and battery condition after cold-weather storage
- Tire tread, pressure, and alignment
- Headlights, brake lights, turn signals, and hazard lights

Mowers (Ride-On & Push)

Key areas to inspect:

- Blade sharpness and balance
- Oil and filter condition
- Deck leveling and belt wear
- Tire pressure and traction
- Safe operation of guards and controls

Handheld Equipment (Trimmers, Edgers & Blowers)

Key areas to inspect:

- Spark plugs and air filters
- Fuel lines and proper fuel mixture
- Throttle response and shutoff switches
- Guards and protective components

Trailers & Transport Equipment

Key areas to inspect:

- Hitch connections, safety chains, and tie-downs
- Trailer lights and wiring
- Tires for wear or dry rot
- Brakes, ramps, and loading mechanisms

Specialty & Seasonal Equipment (Aerators, Seeders & Spreaders)

Key areas to inspect:

- Lubrication of moving parts
- Chains, gears, and wheel assemblies
- Calibration and output settings
- Residue buildup from prior use

Safety & Monitoring Systems

Key areas to inspect:

- Dash cam functionality and camera visibility
- Proper mounting and power connections
- Driver expectations around safe operation
